

Fate - Dragon (Template)

A subtemplate of the main Fate template.

Dragons are very unusual for Fates. Brisingr is a founding/ central member. Dragons are nonhuman and act it, or at least have an intensely strange psyche generally unlike most humans. They struggle to take most concerns seriously, often pursuing short term hedonism. They can weave long term plots, but it can be hard to tell they're doing this, because they'll get distracted so often.

Dragons usually have feline-esque body language. They like nice stuff and have a **very** strong tendency to hoard interesting things. Their behaviors and mentality often parse as immature to humans.
