Kyonin is exactly the same as in Paizo's canon, except that it does not appear on any maps. Like all large forests full of monsters (all large forests), it is considered by humans and other participants in the human-dominant Inner Sea geopolitical order to be a part of the territory of a larger human polity (in this case Galt). Galt has no power there, but non-elf characters will think of the forest as part of the uninhabited or monster-inhabited bits of Galt, not as an independent polity.
