Aydanci is the first known Adarin from the Cycle universe. He was followed by Kidan and then Avedan.

# History

Aydanci was originally married to Alymbel, but she died in her mid-twenties from the pox.[1] A grief-stricken Aydanci then made it his mission to eradicate pox.[2] Once he had finished with pox, he developed vaccines for various other

diseases, traveling to distribute them.[3] On one such trip he met Akibel Mowar, and they realized from the reaction of Aly's old raven servant that Kib was a reincarnation of Alymbel.[4] After some confusion over each other's sexualities- Aydanci had presumed Kib to be as straight as Aly, while Kib thought a dead *wife* implied the same of Aydanci- Aydanci and Kib resumed their relationship.[5] Before he died, he and Kib arranged for gray parrot servants to find their next incarnations after their death.[6]
