Username	pyrophyte

Ekador Serlast is the recently discovered hunti Prime.

Elements

Ekador is hunti with a **strong** crown of sweela. He has the birth blessings of intelligence, flexibility, and resolve. He becomes the hunti prime at twenty one, and activates his powers by exploring the Serlast estate's forest. He has demonstrated the ability to manipulate wood and paper, and to analyze the bone structures of other people.

Background

Ekador's mother moved to Malinqua with him when he was a baby. His father has not been mentioned. He lived in Malinqua until he inherited the role of hunti Prime, and returns to Welce with Kiribel Ardelay, Aleko Ardelay and Sarelle

Dochenza.

Characteristics

Ekador is described as "a young man about [Kiri, Aleko and Sarelle]'s age." He speaks fluent Welchin and Malinquan and has a perfect memory.
