This article is about the Isabella native to Myth. For all characters named Isabella, see Isabella.

Isabella is a Bell from the Myth universe.

History

Isabella was magically created by Vivian Sun in an attempt to restore the lost magical critter species to the world. The spell which created her also revealed that dragons still exist; rather than risk restarting the great dragon/sphinx war, Vivian raised Isabella in secret outside San Francisco, California.

Abilities

Isabella is an accomplished runecaster like her mother. As a sphinx she has a magic inherent in her species that allows her to heal, though if she does so unintentionally she falls unconscious.
