Elements

Isten is coru like his brother, with the birth blessings of luck, resilience and resolve.

Background

Isten is the second son of King Hector of Welce by his second wife Queen Risella. He is abused by his father as a child, though his older brother protects him whenever possible. As children they spend as much time as possible at the Ardelay estate at the invitation of Kiribel Ardelay, who has found out about their father's behavior and attempts to protect them. Isten's brother runs away when he is fourteen with Isten's blessing, at which point Isten becomes his father's heir apparent, though the Primes have yet to confirm him as the official heir.
