Native Magic	Sorcery

This article is about the [Incandescence](#) world. For the local magic system, see [Momentum \(Magic\)](#).

Momentum is a non-Earth planet with one sapient species, [humans](#).

Geography

Momentum has rings and four moons, and no flora or fauna that could not be found on Earth. Known countries include Tanree, Beraz, Ampar and Var. Residents of Tanree speak Reesh, which can also be found in Beraz and Ampar but is uncommon in Var. There are at least five other languages actively spoken.

Society

Momentum is a high-magic, low-science environment, as the nature of their magic makes it extremely difficult to attempt controlled scientific experiments of any scope. Conventional countries and cities exist, but also contain the territories of [sorcerers](#), who exist outside the political structure. Society tries not to depend on permanent magical items, as these are bound to the momentum of their creator and may unexpectedly fail, but a dispatch system to call sorcerers for help is common at least in Tanree.
