Treasury

Treasury	
World	
Name	Treasury
Source Canon	Original
Continuity	Incandescence
Population	
Sapient Species	• Humans
Native Magic	Touched
Tech Level	1970s

Treasury is one of the worlds of Incandescence. It is the sixth world to encounter the Plague of Utopias.

Geography

Treasury is an Earth-like world, in which the continents, species, etc. are the same as Earth's. Treasury can therefore be assumed to contain Earth-equivalent countries, but other than the following, their names are presently unknown.

Noregr

The story takes place in Noregr, a country roughly equivalent to Earth's Norway. Aldaras Sarbror and Zevaia Sarbror are mentioned to have grown up in Seldalr with their father.[1]

Chung-Koet

Chung-Koet is implied to be a China-equivalent. Aldaras and Zevaia lived in a tiny mountain town called Ng Yen until they were eleven.[2]

Society

As an Earth-like world, Treasury's society and history has diverged enough and early enough from our Earth that there are many large-scale differences (mostly in place names). Though the tech level is about equal to Earth's 1970s, the calendar year in Treasury is 1802.

Magic

The only magic in Treasury is artifacts. People who have touched an artifact, known as "touched", gain both a beneficial ability and a negative side effect. Most known artifacts are currently in the possession of the University of Drofnfjord in Noregr.
