Cat

About Cats

Cat is the most-glowficed Kaylin template.

Clusters

In approximate order from most to least common, the Cat clusters are:

- **Leo** - default cluster. This is what you get when a Cat is raised or strongly influenced by an Arthur, or created ex nihilo. The friendliest and most optimistic subtype of Cat.
Examples: most Earth Cats.
- **Michael** - raised or strongly influenced by an Oz.
Examples: Ace of Hearts, Cato Valerius, Michael Haldane.
- **Red** - [on being raised on fairy tales in which you are the monster](#). Member of a persecuted minority.
Examples: Casaleio (Amenta), Kai Arvidsson, Marvel mutant.
- **Aidan** - raised or strongly influenced by a Mordred. Probably spent significant amounts of time locked in a small space with only a few visitors.
Examples: Aeron Lais, Aidan Pender, Callias.
- **Orphan** - spent significant amounts of time alone/fending for themselves prior to the plot, to the point where they have no significant parental influences/authority figures. Leo-like in their strength of personality but significantly angrier at the world.
Examples: Jay (Descendants), Kit Sinistre, the beast.

Name Attractors

Cat names almost always start with A, C, E, K, L, or M. This bears no relation to cluster or any other features of the instance.

Cat

Alanna of Trebond | "Alan" (courage-to-speak)

Circumstance alt of the main character from Tamora Pierce's "Song of the Lioness", but a trans guy.
