Lists of Settings and General Themes

For pages listing settings by genre/ theme or other qualities, or discussing broad trends, or other setting-meta bucket stuff.

List of Fairyland Settings

A list primarily of glowfic settings featuring an onscreen fairyland, a character from said fairyland, or a fairyland that isn't directly shown but that affects the plot or worldbuilding. Links to setting pages/ tags on wiki, on glowfic constellation, and/ or individual notable threads or characters is appreciated but not required. Tagging this page with the settings listed is also good. Please list settings in alphabetical order within a category.

Fairyland-esque

Fun fact: this page is the result of a joke that there's 15 fairyland settings, followed by an attempt to count the actual number.
