E2E Box 165507

Hi {{{name}}} v2

Opt-in value

Shows one cell of the Author Opt Ins table. Values: yes, notify, ask, no (and for co-authors: must agree, exempt, some exempt). Anything else shows as "—" (not stated).

Author opt-in

One author's row in the Author Opt Ins table. Use inside the table on that page:

```
{{Author opt-in | author = Kappa | glowfic id = 3 | public = ask | logged_in = ask | locked = ask | nsfw = ask | coauthors = | notes = ask first please | confirmed = }}
```

- `author`: name as the author goes by; `page`: wiki page or book to link if different; `glowfic_id`: the number in their glowfic.com/users/N address.
- `public`, `logged_in` (threads visible only to logged-in users), `locked` (access-listed or account-locked threads), `nsfw`: yes, notify, ask or no. Leave empty when the author hasn't said.
- `coauthors`: must agree, exempt (co-authors needn't ask), some exempt.
- `notes`: the author's own words. These are what counts; the other columns are a summary of them.
- `confirmed`: yes once the author has checked the columns.
